RESEARCH INTERESTS

Agricultural and Environmental Policy, Agricultural Production and Risk Management, Agricultural Economics

EDUCATION

Kansas State University	Kansas, USA
Ph.D. in Agricultural Economics	2023-2026
Seoul National University	South Korea
M.A. in Agricultural and Resource Economics	2019
Kangwon National University	South Korea
B.A. in Agricultural and Resource Economics and Psychology	2017

JOB MARKET PAPER

"Reference Prices, Bidding, and Enrollment in the Conservation Reserve Program" [Draft]

Abstract: Quantifying the regional economic impacts of crop production is critical for assessing the broader implications of access to natural resources and government policies. However, most existing estimates rely on input-output models with restrictive assumptions and competing theories of economic mechanisms provide little guidance on the sign or magnitude. We estimate local economic spillovers by exploiting a large increase in crop production that occurred due to the expansion of irrigation in counties overlying the High Plains Aquifer after World War II.

WORKING PAPERS

"Resource-Driven Agricultural Clusters: Coagglomeration Effects of the High Plains Aquifer" [Draft]

(Revise and Resubmit, American Journal of Agricultural Economics)

Kihwan Yu and Nathan P. Hendricks

Abstract: Quantifying the regional economic impacts of crop production is critical for assessing the broader implications of access to natural resources and government policies. However, most existing estimates rely on input-output models with restrictive assumptions and competing theories of economic mechanisms provide little guidance on the sign or magnitude. We estimate local economic spillovers by exploiting a large increase in crop production that occurred due to the expansion of irrigation in counties overlying the High Plains Aquifer after World War II. While crop production was directly impacted by access to groundwater, we find that livestock product sales also increased significantly, reaching a 235% increase in sales compared to counties outside the aquifer. The primary spillover to non-farm sectors was an increase in sales in the wholesale sector, perhaps driven by sales of agricultural-related products. These findings provide evidence of coagglomeration incentives, where clusters of agricultural industries find it optimal to produce within the same region.

"Risk Aggregation and Insurance Demand: An Analysis of Enterprise Unit Discounts" [Draft]

Kihwan Yu and Nathan P. Hendricks

Abstract: Quantifying the regional economic impacts of crop production is critical for assessing the broader implications of access to natural resources and government policies. However, most existing estimates rely on input-output models with restrictive assumptions and competing theories of economic mechanisms provide little guidance on the sign or magnitude. We estimate local economic spillovers by exploiting a large increase in crop production that occurred due to the expansion of irrigation in counties overlying the High Plains Aquifer after World War II.

AWARDS

Outstanding Article Award, Korean Agricultural Economics Association	2022
Third Place Award, Paper Competition, Korean Rural Development Administration	2018
Outstanding Undergraduate Thesis Award, Kangwon National University	2016

TEACHING EXPERIENCE

Instructor, Kansas State University

AGEC 115 Decision Tools for Agricultural Economics and Agribusiness	Fall 2024
Average Evaluation: 4.6/5.0	

Workshop Instructor, Kansas State University

Introductory R Workshop for Incoming Students	2026, 2025
---	------------

RESEARCH EXPERIENCE

Graduate Research Assistant, Kansas State University	2023-Present
Researcher, Korea Rural Economic Institute	2020-2022
Researcher, Seoul National University	2019
Graduate Research Assistant, Seoul National University	2017-2018

CONFERENCE PRESENTATIONS

Annual Conference of American Agricultural Economics Association (AAEA), New Orleans, LA.	2024
Annual Conference of American Agricultural Economics Association (AAEA), Washington, DC.	2023

Annual Conference of American Agricultural Economics Association (AAEA), Virtual.	2021
Annual Conference of American Agricultural Economics Association (AAEA), Virtual.	2020
Annual Conference of North American Regional Science Council (NARSC), Pittsburgh, PA.	2019

OTHER ACTIVITIES

Undergraduate Study Mentor	2016
President, Food System Research Society	2015
Student Committee Member, Agricultural Economics	2014

DISSERTATION COMMITTEE

Nathan Hendricks (chair)	Professor nph@ksu.edu Kansas State University	Jeniffer Ifft	Professor jifft@ksu.edu Kansas State University
Jesse Tack	Professor jtack@ksu.edu Kansas State University	Jisang Yu	Professor jisangyu@korea.ac.kr Korea University
